

Environmental responsibility Charter

Hull Museums and Gallery recognises the climate emergency and is committed to reducing our impact on the environment through:

Energy Management

We will work with Hull City Council on energy efficiency improvement schemes to maintain our buildings and improve energy efficiency, reducing emissions from heating and lighting.

Waste Management

We will embed Reduce, Reuse, Recycle, using environmentally responsible methods, materials and resources within our displays, exhibitions, programme and marketing.

Travel and Transport

We will reduce staff travel by maximising use of digital communications and promote Hull City Council incentives for environmentally friendly travel to work schemes.

Procurement

We will consider environmental impact when selecting suppliers for goods and services.

Programme

We will deliver exhibitions and programmes that highlight the climate and sustainability, use our green spaces to promote nature and biodiversity, maintaining partnerships with organisations promoting environmental responsibility.
